

COMPLETE

Visa Application Centre Appointment Checklist

United Kingdom - Standard Visitor Visa, biometric appointment day

Before your appointment

- Confirm your Visa Application Centre location, date, and time
- Pay the visa fee and complete the online application in full
- Check whether you're eligible to use the ID Check app instead of attending in person - if so, follow the app's own instructions rather than this checklist
- Gather your document set (see the Document Checklist)
- Check your specific centre's rules on bags, electronics, and photography - these vary by provider and location

What to bring

Item	Notes
Passport	Valid, with blank pages if a vignette is used for your route
Appointment confirmation	Printed or on your phone, per the centre's instructions
Photo	If required in addition to the biometric enrolment - check your centre's rules
Supporting documents	Financial, employment, and ties evidence - see the Document Checklist
Previous passports	If they show earlier UK or international travel

Biometrics only, usually no interview

Most Standard Visitor applicants are not interviewed - your appointment is mainly for fingerprints and a photo. Your actual application is assessed separately, on paper, by an Entry Clearance Officer.

At the centre

- Arrive at your booked time - most centres operate on a slot system with limited flexibility
- You'll go through identity verification, fingerprint and photo capture
- Some centres offer optional paid services (document scanning, priority lounges) - these are optional add-ons, not required for your application to proceed

After your appointment

- Track your application status through the UKVI/gov.uk tracking service if available for your application type
- If approved, most applicants now receive an eVisa (digital immigration status) rather than a passport vignette - check gov.uk for what applies to your route and create a UKVI account to view/share your status if instructed to
- If refused, see the Refusal Decision Guide (Premium tier)
